

7 YEAR WARRANTY ON AIRSWEEP® UNITS

Control Concepts, Inc. (CCI) will provide a 7-year warranty on our stainless steel or carbon steel AirSweep® Main Body for the VA-06, VA-12, and VA-51 units. The AirSweep 316 stainless steel internal spring has a life expectancy of at least one million cycles. An AirSweep Maintenance Kit is recommended depending upon visual inspection when changing springs. Any significant wear on other internal parts would call for a repair kit. This also depends upon how the timer control is set and the number of shifts per month. The spring life may run for many years – it needs to be changed every million cycles as it begins to lose compression strength.

If proper maintenance of the complete AirSweep unit is met, CCI will replace the AirSweep Main Body free of charge (not including shipping and/or duty) if it fails during the 7-year warranty period.
